

The long-term, multi-agency project of improvements to the infrastructure under Savannah Road as well as the recent upgrades to the crosswalks is progressing.

Under the ADA compliance, DelDOT has completed the refurbishing of 70+ cross walks which will provide those with disabilities a safe and convenient means of accessibility.

The BPW is working to improve water quality on Savannah Road by abandoning 100 year-old (4"- 6") water mains. This will not affect the water service or pressure while homes and businesses are being hooked-up to the newer installed mains.

Upon completion of the installation of the new water mains, DelDOT will continue to repave Savannah Road, work that already has been finished from Second Street to Lewes Beach. The "repaving" involves a new technology which should extend the life of the pavement. Once this is completed, all town-side crosswalks will be restored using long-lasting thermoplastic paint. Assuming the weather cooperates, DelDOT should have the paving completed by the end of May 2015.

We thank you for your patience and cooperation as these improvements continue!
